PROFESSIONAL SUMMARY

1. Proficient in WordPress CMS: Possessing a good understanding of the WordPress Content Management System, including how to create pages and posts, upload media, install and activate themes and plugins, and customize the site's appearance and functionality.

2. Capable knowledge of web development: Familiarity with HTML, CSS, and JavaScript, and an understanding of how they are used to build and modify WordPress sites. Able to use code snippets to customize WordPress themes and plugins.

3. Experience with WordPress themes and plugins: Knowledge of how to select and install appropriate WordPress themes and plugins for specific website needs.

4. Strong communication skills: Able to communicate effectively with clients or team members to understand their needs and offer suggestions for improving their WordPress site.

5. Attention to detail: Skilled at paying attention to details such as formatting, layout, and typography to ensure the site looks professional and visually appealing.

6. Passion for learning: Continuously seeking out new ways to improve knowledge and skills related to WordPress development. Willing to learn new tools and techniques to improve workflow and optimize WordPress sites.

7. Understanding of website security: Knowledge of common website vulnerabilities and best practices for securing WordPress sites, including the use of secure passwords, regular backups, and security plugins.

EXPERIENCE

Information Technology Specialist
Genie Global Group, Chennai   Apr'21 to till date

As an Information Technology (IT) specialist working for Genie Global Group, my responsibilities would involve managing the company's technology infrastructure and ensuring that it meets the business requirements. This would include designing and implementing network security protocols to protect sensitive data, managing the company's servers and databases, and ensuring that all software is up-to-date and properly integrated. Additionally, I would be responsible for troubleshooting any IT-related issues that arise and providing technical support to end-users. As part of my role, I would also stay up-to-date with emerging technologies and trends, and recommend new tools or solutions that could improve the company's operations or reduce costs. Finally, I would work collaboratively with other members of the Genie Global Group team to identify opportunities for technology innovation and to develop and implement strategies for enhancing the company's IT infrastructure and performance.

As an IT specialist for Genie Global Group, I would bring a strong technical skillset, attention to detail, and collaborative mindset to drive innovation and success for the company.
